<i>Brief description</i>	<p>Full Professor in Comparative anatomy and Citology at the University of Cagliari. Her main scientific interests are bionomy and spatial-temporal distribution of halieutic resources working with national and international researchers and institutions. Furthermore, she studies the life history with particular attention to the growth, reproductive strategy and eco-etology of some marine species directly on the field, on board of sardinian fishing boats. Since 1994 she has been mainly involved in several EU funded projects as i.e. the International Research Program MEDITS and in National MIPAF funded Project as CAMPBIOL. From 2015 she is Scientific Responsible of the projects mentioned above.</p> <p><i>Currently, she is Chair of the Working Group of ICES (International Council for the exploration of the sea) on Biological Parameters (WGBIOP).
