The aforementioned scientific production, given the topics dealt with, has always been accompanied by a strong interaction with the industrial world aimed at technology transfer.

It is evident from my involvement in patent activities and in many contracts of collaboration with companies of various sizes (SMEs and multinationals). Finally, the knowledge acquired in the scientific field and the awareness of the needs of the industrial world have been realized, in recent years, in my participation as an expert in the work of the Marine Environment Protection Committee (MEPC) of the International Maritime Organization (IMO) which is the United Nations agency dedicated to the promotion of maritime cooperation between member countries and to ensuring the safety of navigation and the protection of the marine environment.
