

Valeria Di Dato
Born in Naples 07/01/1976

Current Position: PostDoc

Affiliation:

IME Section, Stazione Zoologica Anton Dohrn
Villa Comunale 1,80121 Napoli - Italia

Tel.: +39 081 5833430

Fax: +39 081 7641355

E-mail: valeria.didato@szn.it

Supervisor: Adrianna Ianora/Giovanna Romano

Appointed on project: PharmaSea

EDUCATION/TRAINING/EXPERIENCE

Institute and Location	Degree/Function	Year	Field of Study
University of Naples "Federico II"	Master Degree	2000	Biology
University of Naples "Federico II"	Certified by the board of Italian Biologist	2001	Biology
University of Naples "Federico II"/ Zoological Station Of Naples "Anton Dohrn"	Training	2000/2001	Biochemistry and Molecular Biology
University of Naples "Federico II"/ Zoological Station Of Naples "Anton Dohrn"	PhD	2001/2005	Molecular and Cellular Biology and Pathology
Institut de Genetique et Biologie Cellulaire et Moleculaire. Strasbourg, France	Post Doc	2005/2007	Neuroscience Molecular and Cellular Biology
Fondazione Santa Lucia, Roma/ Ceinge, Napoli	Post Doc	2008	Behavioral Neuroscience Lab
Angelini Acraf, Formia/ Ceinge, Napoli	Post Doc	2008/2009	Human genetics and cancer Lab
Ceinge, Napoli	Temporary Research Associate	2009/2010	Human genetics and cancer Lab
Zoological Station Of Naples "Anton Dohrn"	Temporary Research Associate	2013/2014	Ecology and Evolution of Plankton Laboratory
Zoological Station Of Naples "Anton Dohrn"	Temporary Research Associate	2014/2015	Ecology and Evolution of Plankton Laboratory
Zoological Station Of Naples "Anton Dohrn"	Temporary Research Associate	2015/2016	Integrated Marine Ecology Section

Interessi di ricerca:

Una piccola goccia di oceano contiene migliaia di organismi viventi dalle più disparate caratteristiche fisiche e fisiologiche utilizzabili in campo biotecnologico. Infatti alcune

microalghe che popolano anche i nostri mari, chiamate diatomee, producono molecole con attività farmacologica e nutraceutica.

L'obiettivo del mio progetto è studiare il contenuto genomico e proteico di alcune specie di diatomee, selezionate in base all'attività farmacologica che esercitano su cellule di altri organismi viventi. Mediante tecniche di biologia molecolare e cellulare e di bioinformatica, lo studio cerca di capire i geni coinvolti nella fisiologia e metabolismo di tali microalghe e lo schema di sintesi delle molecole responsabili dell'attività farmacologica.

In a little ocean drop, there are thousands of living microorganisms with many diverse forms and metabolisms that can be useful by a biotechnological point of view. Indeed, some microalgae called diatoms, living also in our seas, are able to produce molecules with pharmacological and nutraceutical activity.

My project objective is the study of the genomic and proteomic content of selected diatoms, based on their ability to pharmacologically interfere on cells from other organisms. Using bioinformatics and molecular and cellular biological methods, the study try to understand which genes are involved in the physiology and metabolism of such microalgae and the pathways responsible for the synthesis of bioactive metabolites.

Journal Papers
