WORK EXPERIENCE

1st May 2022 – 30th April 2025

Visiting Fellow

The Open University, Walton Hall, Milton Keynes, United Kingdom, MK7 6AA

Drug discovery from marine organisms in collaboration with colleagues at Faculty of Science, Technology, Engineering and Mathematics at The Open University

1st July 2017- now (Permanent Staff from 1st October 2018)

Researcher

Stazione Zoologica Anton Dohrn

My research interests are in marine biology, functional genomics and marine biotechnology. Currently, I am analysing microalgal transcriptomes to study metabolic changes induced by stressful culturing conditions, enzymes involved in the synthesis of secondary metabolites and/or other enzymes with potential biotechnological applications. I am testing the bioactivity (e.g. antioxidant, anti-inflammatory, anticancer, anti-diabetes) of marine organisms, mainly microalgae, in order to isolate biologically active compounds for human health applications. In addition, I am also studying physiological and molecular responses to biotic and abiotic stressors (e.g. ocean acidification, cold, nutrient starvation or enrichment, exposure to microalgal secondary metabolites) in marine organisms, especially microalgae.

1st February 2013- 30th June 2017

Post-doc

Stazione Zoologica Anton Dohrn

My research was mainly focused on the activities related to the EU FP7 project PharmaSea (<http://www.pharma-sea.eu/>). Within the PharmaSea project, I was responsible for microalgae sampling, genotyping, culturing, bioactivity screening and molecular analyses (e.g. gene expression and transcriptomes). I was responsible for preparing and analysing the transcriptomes of active microalgae in order to study metabolic changes induced by stressful culturing conditions and to identify enzymes/metabolic pathways involved in the synthesis of secondary metabolites with potential biotechnological interest. I also tested bioactivity of microalgal pellets for possible anti-inflammatory, antioxidant, anti-diabetes, antibacterial, anti-biofilm and anticancer activities in order to isolate and characterise biologically active compounds for human health.

Sector Marine Biology and Biotechnology

9th of December 2015 to the 3rd of January 2016

Post-doc Scientist

Oceanographic cruise on board of the vessel “HESPERIDES” for sampling in Sub-Antarctic waters as part of a H2020 EUROFLEET2 project PharmaDeep

Expedition to the South Shetland Trench in Antarctica as part of a H2020 EUROFLEET2 project called “PHARMADEEP, Drug discovery from the deep Antarctic waters”. I was responsible for the planning and sampling of planktonic species, and support for deep bacteria sampling. Experiments consisted in the study of phytoplankton abundance, copepod fitness, gene expression and analyses of microalgae secondary metabolites. In addition, microalgal pellets have been used for chemical extraction and bioactivity screenings for possible activities for human health.

Sector Marine Biology and Biotechnology

17th February 2015-17th April 2015

Post-doc Scientist
University of Tromsø, Norway

I was responsible for microalgae culturing and bioactivity testing for anti-inflammatory, antioxidant, anti-diabetes, antibacterial, anti-biofilm and anticancer activities, and HPLC analyses within the EU PharmaSea project.

Sector Marine Biology and Biotechnology

23rd May- 3rd June 2011

Visiting Scientist
Göteborg University, Sven Lovén Centre for Marine Sciences, Kristineberg (Sweden)

EU FP7 Project ASSEMBLE (Association of European Marine Biological Laboratories) Transnational Access (Access to "Tjarno and Kristineberg" 3rd call; (grant no. 227799). I was responsible for experiments on the effects of diatom secondary metabolites on different copepod populations, both at physiological and molecular level. Experiments included analyses of copepod fitness (egg production, hatching success, nauplii viability and teratogenesis, adult behaviour and survival), gene expression for both zooplanktonic and phytoplanktonic species (RT-qPCR and transcriptomes) and analyses of microalgae secondary metabolites.

Sector Marine Biology and Chemical Ecology

7th of April 2011-14th of April 2011

Scientist
Oceanographic cruise on board of the vessel "URANIA"

I was responsible for *in-situ* experiments during a natural diatom bloom and the study of phytoplankton abundance, copepod fitness (egg production, hatching success, nauplii viability and teratogenesis, adult behaviour and survival), gene expression analyses for both zooplanktonic and phytoplanktonic species (RT-qPCR and transcriptomes) and analyses of microalgae secondary metabolites.

Sector Marine Biology and Chemical Ecology

17th – 29th May 2010

Visiting Scientist
Station Biologique de Roscoff, Roscoff (France)

EU FP7 Project ASSEMBLE (Association of European Marine Biological Laboratories) Transnational Access (Access to "Roscoff" 1st call). I was responsible for experiments on copepod-diatom interactions. In addition to diatoms, other microalgae have been tested and studied, i.e. two dinoflagellate species. Experiments included analyses of copepod fitness (egg production, hatching success, nauplii viability and teratogenesis, adult behaviour and survival), gene expression for both zooplanktonic and phytoplanktonic species (RT-qPCR and transcriptomes) and analyses of microalgae secondary metabolites.

Sector Marine Biology and Chemical Ecology

7th January 2009- 14th December 2011

PhD student
Stazione Zoologica Anton Dohrn

The aim of the thesis was to study the interactions between copepods (e.g. *Calanus helgolandicus* and *Calanus sinicus*) and different microalgae, both diatoms and flagellates. I was responsible for the following analyses/investigations:

- Toxic algal diet effects on copepod fitness (egg production, hatching success, nauplii viability and teratogenesis, adult behaviour and survival) and gene expression (RT-qPCR and transcriptomic approaches).
- Stress response in different copepod populations and identification of key stress gene markers.

Analyses of microalgae secondary metabolites and their possible bioactivities.

Sector Marine Biology and Chemical Ecology

2005-2006 (1 Year)

Training ("Internato")

University Federico II of Napoli, Italy, Faculty of Veterinary Medicine

During the training, I studied anticancer drug effects on rat cardiocytes. I acquired expertise in *in vitro* and *in vivo* studies, molecular biology and pharmacological techniques.

Sector Cellular and Molecular Biology

EDUCATION

7th January 2009 - 14th December 2011

PhD in Animal Biology

University of Calabria, Italy and Stazione Zoologica Anton Dohrn, Italy

The aim of the thesis was to study the effects of toxic diets in the copepod *Calanus helgolandicus* at gene level. The genes of interest were analysed in various experimental conditions, as copepods exposed to algae (both dinoflagellates and diatoms) which produce or not toxic metabolites, during field or laboratory experiments. In addition, the effects of the oxylipin producing diatom *Skeletonema marinai* have been tested on three different *C. helgolandicus* populations. Gene expression level patterns in the different experimental conditions tested may help to understand the copepod defence systems and stress response.

I was responsible for the genotyping of both microalgae and copepod species, microalgae maintenance and culturing, and molecular analyses (e.g. RNA and DNA extraction, gene expression and sequence analyses, transcriptomes).

2006-2008
(Thesis discussion 24th June 2008)

M.Sc. in Pharmaceutical Biotechnologies

University Federico II of Napoli, Italy, Faculty of Biotechnology

110/110 cum laude

Including 1 year laboratory training
Study of the inflammatory process.

Thesis: ODN DECOY for NF-kappaB released by PLGA microspheres in rat chronic inflammation

2003-2006 (Thesis discussion 19th December 2006)

B.Sc. in Biotechnology

University Federico II of Napoli, Italy, Faculty of Biotechnology

110/110 cum laude

Including 150 hours laboratory training
Study of the inflammatory process.
Thesis: Pro- and anti-apoptotic protein analyses in rat chronic inflammation

ADDITIONAL INFORMATION

Grants

1. **EU FP7 ASSEMBLE Project:** Grant by ASSEMBLE EU Project to perform the project "Molecular investigations of the stress response induced by diatom oxylipins in the copepod *Calanus helgolandicus*" at the Station Biologique de Roscoff, France, from 17th to 29th May 2010. Experiments included analyses on copepod fitness (egg production, hatching success, nauplii viability and teratogenesis, adult behaviour and survival), gene expression for both zooplanktonic and phytoplanktonic species (RT-qPCR and transcriptomes) and analyses of microalgae secondary metabolites.
2. **EU FP7 ASSEMBLE Project:** Grant by ASSEMBLE EU Project to perform the project "Stress response in the copepods *Calanus helgolandicus* and *Calanus finmarchicus* after feeding on the oxylipin-producing diatom *Skeletonema marinoi*" at the Sven Lovén Centre for Marine Sciences, Kristineberg, Sweden, from 23rd May 2011 to 3rd June 2011. Experiments included analyses on copepod fitness (egg production, hatching success, nauplii viability and teratogenesis, adult behaviour and survival), gene expression for both zooplanktonic and phytoplanktonic species (RT-qPCR and transcriptomes) and analyses of microalgae secondary metabolites.
3. Grant by **COST** (European Cooperation in Science and Technology) to participate in COST Action ES0906: Seagrass productivity: from genes to ecosystem management, performed in Vulcano (Aeolian Island, Italy) on 6-11 May 2013.
4. Travel Grant by **EUR-OCEANS** to participate to the EOC hot topics conference PLOCAN (Gran Canaria, 6-8 Nov. 2013).
5. Travel Grant by **COST** of 500,00 euro (COST Action ES0906) to participate to the Congress Seagrasses in Europe: Threats, Responses and Management (4-6 March, 2014, Olhão, Portugal)
6. **H2020 EUROFLEET2** project called "PHARMADEEP, Drug discovery from the deep Antarctic waters", consisting in an oceanographic cruise on board of the vessel "HESPERIDES" for sampling in Sub-Antarctic between 9th December 2015 and 3rd January 2016. Grant agreement n° 312762.
7. Grant Transnational Access program of **ASSEMBLE Plus**, application n. 13151, "Microalgal Metabolites For Human Biotechnological Applications" (MICROBIO) 2021.
8. • Grant Transnational Access program of MIRRI: 'Microalgae effects Against pathoGenIC bacteria and fungi' (PID: 21841) 2022.

Master student co-tutoring and/or training support

- Darta Stalberga, Bachelor thesis, IMC Fachhochschule Krems, University of Applied Sciences, Austria (Sept 2018 – Feb 2019) - Tutor
- Ali Murat Elagoz, Master thesis, **EU IMBRSEA program** (Jan 2019- June 2019) - Tutor

PhD student tutoring, co-tutoring and/or training support

- Director of Study for Giorgio Maria Vingiani, **PhD Open University**, Stazione Zoologica Anton Dohrn, Italia (2018- 2022)
- Internal supervisor for Kevin Andres Martinez, **PhD Open University**, Marie Curie fellowship, Stazione Zoologica Anton Dohrn, Italia (2017- 2020)
- Co-tutor for Eleonora Montuori, PhD Università di Messina (2022-2024)
- Internal supervisor for Gabriele De Falco, **PhD Open University**, Stazione Zoologica Anton Dohrn, Italia (2022- 2024)

Post Doc

- Dr Gennaro Riccio (01/07/2019 – 30/06/22)
- Dr Kevin Andrade Martinez (16/10/2020-16/04/2021)
- Dr Assunta Saide (22/12/2020-31/08/2021)
- Dr Anita Capalbo (01/12/21-30/06/22)

Teaching activities

- Co-organizer and teacher for the PhD course in Marine Biotechnology: "New Perspectives in Marine Biotechnology" lasted 3 days (9-11 December 2020) at Stazione Zoologica Anton Dohrn, Napoli.
- Co-organizer and teacher for the PhD course in Marine Biotechnology: "New Perspectives in Marine Biotechnology" lasted 4 days (20-23 March 2023) at Stazione Zoologica Anton Dohrn, Napoli.

Congress organization

- FIRST ARC-OU CANCER CONFERENCE: 2nd AND 3rd DECEMBER 2021. Organising committee: Jon Golding and Dr Francesco Crea (OU), Elena Jachetti (INT), Chiara Lauritano (SZN), Mariaelena Valentino (IFOM). During this conference I also was a speaker and a session chair.
- Member of the Organising committee for 1st International Summer school of Blue Biotechnology, held at Stazione Zoologica Anton Dohrn (Naples, Italy) 21-23 Sept. 2022.

Other Institutional responsibilities

- Commission member for more than 30 post-doc position evaluations at Stazione Zoologica Anton Dohrn: Assegni di ricerca, Borse di studio e co-co-co (from 2018)
- "Seminar Commission" at Stazione Zoologica Anton Dohrn (from 23/11/2018): Selection of speakers for institutional seminars for the years 2018-2019 and 2019-2020 (till 30 November 2020).
- Comitato elettorale (2019): Commission for voting personnel representatives
- Membro Comitato di Coordinamento del Dottorato SZN dal 10/07/2020-9/07/23 – Member of the PhD steering Committee
- Comitato elettorale (2021): Commission for voting Postdoc and PhD representative
- Commission President for three PhD positions available at SZN, and member of the commission for other two PhD positions at SZN;

Talk Presentations

1. Talk presentation "Promising antiproliferative compound from the green microalga *Dunaliella tertiolecta* against human cancer cells". II WORKSHOP GIOVANI AISAM, 24 September 2021
2. Talk presentation on "Transcriptomic approach to study marine microalgae as source of bioactive secondary metabolites" at the International Conference on Bioinformatics and Computational Biology (BBCC2021) 1 December 2021
3. Talk presentation on "Marine organisms as a source of new compounds for cancer treatment" at the First OU-ARC Cancer Conference, 2 December 2021
4. Talk presentation on "Marine organisms as possible source of compounds for human health. 5th May 2022. Seminar organized by SZN and Dohm foundation for the general public.
5. Invited Talk on "Natural products and enzymes from marine microalgae" at Algaeafarm. Pordenone 26th May 2022.
6. Talk "Drugs from the Sea" at the 1st International Summer school of Blue Biotechnology, held at Stazione Zoologica Anton Dohrn (Naples, Italy), 21-23 Sept. 2022
7. Invited Talk: "Marine organisms as source for innovative biotechnological applications" at the 52° SIBM congress (Italian society of marine biology) - Messina, 13 June 2023.

Other dissemination activities

Dissemination at Futuro Remoto Event (Naples, Italy), Mostra D'Oltremare (Naples, Italy), Sea turtle nest monitoring (Paestum, Italy), Dissemination event for The Open University (UK).
