

Curriculum vitae

Francesco Bolinesi, Ph.D.
Department of Biology, University of Naples Federico II

University: University of Naples Federico II – 1st and 2nd degree “Biologia delle Produzioni marine” a.y. 2015
Ph.D in Biology “Effect of light, iron and vitamin B₁₂ co-limitation on phytoplankton species from the Ross Sea (Antarctica).” XXXII cycle, 2020.

Current position: researcher RTDA at the Department of Biology, University of Naples Federico II, Italy.

Course of: Ecology of Extreme Environments (6-CFU)- LM Biology of Extreme Environments (BEXE); Marine Biology (6-CFU)

Research activity: the scientific activity falls within the frame of marine phytoplankton ecology, and address community structural and functional patterns. Particularly attention is paid to spatial and temporal scales as determinant drivers of community dynamics. Highly variable and extreme ecological systems are investigated as those providing an appropriate context for studying scale-induced variations, namely transitional waters systems of the Mediterranean and polar regions.

Research collaboration foreign institutions

Hollings Marine Laboratory, Department of Biology, College of Charleston South Carolina (USA).
Collaboration with Prof. G.R. DiTullio
University of North Carolina at Wilmington (UNCW), Center of Marine Science NC (USA).
Collaboration with Prof. CR Tomas
