Marco Bartoli is Associate Professor at the Department of Chemistry, Life Sciences and Environmental Sustainability (SCVSA) the University of Parma (since 2017), where he coordinates the Laboratory of Benthic Functioning (BeFun). He has been a graduated technician at the University of Parma (2000-2016) and holds a PhD in Ecology (1996). He is affiliated at Klaipeda University (Lithuania) since 2011. At SCVSA Department he is vice-president of the Master's degree in Sciences and Technology for Environment and Resources, he is member of the International Mobility Commission (2017-) and was member of the Students-Teachers Joint Commission (2017-2019).

He is a biogeochemist and ecosystem ecologist broadly interested in aquatic ecosystems and in how humans alter their functioning. He is focused on answering fundamental questions about energy flow and biogeochemical cycling of nutrients (nitrogen, phosphorus, and silica), carbon, and oxygen across the land-coastal continuum. In the last 25 years he was involved as partner or coordinator in national and international research programmes.

Research themes include: -eutrophication; - primary production in aquatic environments; - bioturbation and benthic heterotrophic processes; - greenhouse gas dynamics in shallow water bodies; - interactions between microbial communities and macrophyte roots; - nutrient mass balance at different spatial scales; - the impact of agriculture, animal farming and aquaculture on aquatic environments.

He regularly presents the results of his research in national and international conferences, is active in education and public outreach, serves as reviewer for different journals in the field of Aquatic Ecology and is Associate Editor of the international journals Estuaries and Coasts and Water. He was supervisor of >100 master students (Ecology and Environmental Sciences) and of 12 PhD students (Ecology). He is author of 2 book chapters and of 148 manuscripts in international journals with IF, h index 35, total citations 3526 (source SCOPUS).
