**Current Position:** Research fellowship

**Supervisor:** Pietro Battaglia

**Appointed on project:** Marine Strategy Convention – Recreational Fishing

**Affiliation:**

Section Integrated Marine Ecology, Stazione Zoologica Anton Dohrn – Sicily Marine Center, Messina (Italy)

### Education/Training/Experience

Institute and Location	Degree / Function	Year	Field of Study
Department of MM. FF. NN Sciences, University of Messina. Messina, Italy	Bachelor Degree	2014-2018	Biological Sciences
Department of Biological, Geological and Environmental Sciences, Alma Mater Studiorum-Università di Bologna (Campus Ravenna). Ravenna, Italy	Master Degree	2018-2020	Marine Biology

Stazione Zoologica Anton Dohrn	Research fellowship	2022-current	Marine Biology
--------------------------------	---------------------	--------------	----------------

### **Other matters relevant to scientific career**

#### **Collaboration at the Laboratory of Marine Biology and Fishing of Fano (PU) for the development of scientific paper.**

[from May 2021 to May 2022]

Cooperation in the design of the project starting from a partial reworking of the master's thesis, support in the execution of statistical analysis to inspect the spatio-temporal shifts in biomass and distribution of the whiting (*Merlangius merlangus*) potentially related to changes in sea water temperature and dissolved oxygen due to climate change.

#### **Research fellowship for the project: "Monitoring of recreational fishing in Campania, Basilicata, Calabria, and Sicily " as part of the "Research Convention between the Anton Dohrn Zoological Station and ISPRA.**

[from July 2022 to current]

Study of recreational fishing in Campania, Basilicata, Calabria, and Sicily, through data collection, interviews, and compilation of logbooks. The data being collected, cover the catches and the fishing effort, the characteristics of the fishing gear used, the fishing areas exploited, and socio-economic aspects of this activity.
