

Curriculum Vitae Europass

Personal Information

First name(s) / Surname(s)	Luca Ambrosino
Address(es)	traversa privata Sanseverino n. 8, 80128 Napoli
Telephone(s)	Mobile: 3398496090
E-mail	Luca.bioinfo@gmail.com
Nationality	Italy
Date of birth	08/07/1979
Sex	Male

Occupational field

Bioinformatics / Computational Biology

Employment

Scientific fields	Comparative genomics, nucleotide and proteic sequences analyses, networks of ortholog and paralog genes, metabolic pathways analyses, three-dimensional modeling of protein structures, molecular dynamics simulation.
Dates	November 2017 – ongoing
Qualification	Research fellowship
Name and type of organization	Research Infrastructures for Marine Biological Resources (RIMAR) - Stazione Zoologica "Anton Dohrn" - Napoli
Areas of research	Comparative genomics of marine species
Details	Ortholog, paralog and species-specific genes prediction, metabolic network analysis, three-dimensional protein structure prediction
Dates	December 2016 – October 2017
Qualification	Scientific collaboration
Head of research unit	Prof. Mazzoleni c/o Università degli Studi di Napoli "Federico II"
Areas of research	Functional biology of yeast cells
Details	Comparative genomics; orthologs and paralogs prediction.

Dates	June 2016 – November 2016
Qualification	Grant as part of the project of "AIB 2011 Parco Nazionale del Cilento e Vallo di Diano"
Name and type of organization	Università degli Studi di Napoli "Federico II" – Dipartimento di Agraria
Areas of research	Implementation of bioinformatics methodologies for comparative genomics analyses.
Details	Pipelines development for orthologs, paralogs and species-specific genes prediction in <i>Solanum lycopersicum</i> (tomato) and <i>Solanum tuberosum</i> (potato)
Dates	May 2016 – June 2016
Qualification	Italian Co.Co.Co (continuous collaboration contract)
Name and type of organization	NO SELF S.R.L. via Cinthia – Parco San paolo, 10 – 80126 Napoli
Areas of research	Bioinformatics analysis of sequencing data from yeasts.
Details	Orthologs and paralogs network construction in yeast species.
Dates	December 2015 – April 2016
Qualification	Scientific collaboration
Head of research unit	Prof. Maria Luisa Chiusano c/o Università degli Studi di Napoli "Federico II"
Areas of research	Implementation of methods for orthology and paralogy prediction.
Details	Network prediction of orthologs and paralogs in <i>Solanum lycopersicum</i> (tomato) and <i>Vitis vinifera</i> (grapevine)
Dates	February 2015 – November 2015
Qualification	Italian Co.Co.Co (continuous collaboration contract) as part of the project "GENHORT"
Name and type of organization	Università degli Studi di Napoli "Federico II" – Dipartimento di Agraria
Areas of research	Platform development for comparative genomics analyses of Solanaceae
Details	Pipeline development for comparisons based on orthologs and paralogs networks, detection of species-specific genes, functional domains prediction, metabolic networks analysis.
Dates	October 2013 – February 2015
Qualification	Grant as part of the C.A.R.I.N.A. project
Name and type of organization	Consiglio Nazionale delle Ricerche (CNR) – Istituto di Bioscienze e Biorisorse (IBBR)
Areas of research	Implementation and development of bioinformatics platform for comparative genomics of agronomic species.

	Details	Development of a database of <i>Arabidopsis thaliana</i> paralog genes, development of comparative genomics approaches based on mRNA sequences comparison.
Education and training		
	Dates	May 2013 – May 2016
	Title or qualification awarded	PhD in Computational Biology and Bioinformatics
Principal subjects / occupational skills covered		Bioinformatics, computational biology, molecular biology, comparative genomics, gene networking
	Thesis	Comparative Approaches for Plant Genomes: Unraveling “Intra” and “Inter” Species Relationships from Preliminary Gene Annotations
	Areas of research	<i>Development of a database of Arabidopsis thaliana paralog genes, development of a software for orthologs prediction from mRNA sequences, comparative analysis of Solanum lycopersicum (tomato) e Vitis vinifera (grapevine), prediction of ortholog, paralog and species-specific genes, prediction of functional domains, enzymatic classes and metabolic pathways of Solanum lycopersicum (tomato), Vitis vinifera (grapevine) and Solanum tuberosum (potato)</i>
Name and type of organization		Università degli Studi di Napoli “Federico II” – Dipartimento di Agraria
	Dates	December 2012 - May 2013
	Title or qualification awarded	Postgraduate training
Principal subjects / occupational skills covered		Computational biology, bioinformatics, Biochemistry, biotechnology
	Head of research unit	Dott.ssa Donatella De Pascale
	Areas of research	Three-dimensional modeling by homology modeling and molecular dynamics simulations of protein structures from antarctic bacteria.
Name and type of organization		Consiglio Nazionale delle Ricerche (CNR) – Istituto di Biochimica delle Proteine (IBP)
	Dates	2009 - 2012
	Title or qualification awarded	Molecular and Industrial Biotechnology - 2nd cycle degree - Master
	Thesis	A Structural Analysis of Four Novel Disease-Causing PAH Mutants
	Areas of research	Three-dimensional modeling of 4 mutants of human enzyme Phenylalanine Hydroxilase (PAH), isolated after a positive neonatal screening to hyperphenylalaninemia pathology.
	Vote	107/110
Name and type of organization		Università degli Studi di Napoli “Federico II” - Facoltà di Scienze Biotecnologiche
	Dates	2006 - 2009
	Title or qualification awarded	Biomolecular and Industrial Biotechnology - 1st level degree – Degree/Bachelor

Thesis	Time-solved fluorescence of FAD coenzyme																								
Areas of research	Time-solved fluorescence spectroscopy analysis in order to study conformational dynamics of FAD coenzyme when pH changes.																								
Vote	110/110																								
Name and type of organization	Università degli Studi di NAPOLI "Federico II" - Facoltà di SCIENZE BIOTECNOLOGICHE																								
Dates	1995 – 1999																								
Title or qualification awarded	Secondary school diploma – scientific certificate																								
Vote	48/60																								
Name and type of organization	Liceo Scientifico Statale L.B. Alberti - Minturno																								
Personal skills and competences																									
Mother tongue(s)	Italian																								
Other language(s)	English																								
Self-assessment

DOI: 10.1007/s12010-013-0713-1 (IMPACT FACTOR: 1,751) (vedi</p>

allegato 18). Ambrosino ha effettuato gli studi di modeling tridimensionale per omologia e le simulazioni di dinamica molecolare, e ha scritto il manoscritto.

Oral presentations

L. Ambrosino, H. Bostan, V. Ruggieri, M.L. Chiusano (2016). "An integrated multi-level comparison highlights common aspects and specific features between distantly-related species: Tomato and Grapevine" - BITS 2016, 13th Annual Meeting of the Bioinformatics Italian Society, June 15-17, 2016, University of Salerno, Italy. (presentazione orale sostenuta da L. Ambrosino) (abstract vedi allegato 19)

L. Ambrosino, H. Bostan, V. Ruggieri, L. Frusciante, M.L. Chiusano (2015). "Solanum lycopersicum versus Vitis vinifera: a multilevel gene comparison from fleshy fruit species" – joint Congress SIBV-SIGA 2015, Feeding the planet: plant science and breeding for the future, September 8-11th Milano, Italy. (presentazione orale sostenuta da L. Ambrosino) (abstract vedi allegato 20)

H. Bostan, L. Ambrosino, V. Ruggieri, M.L. Chiusano – "Characterization of derivative relationship between tomato and grapevine: a key step to investigate fruit development in the two species" – Quality Fruit 2014, 3rd Annual Conference of the Cost Action FA1106, September 21-24th Chania, Greece. (presentazione orale sostenuta da L. Ambrosino) (abstract vedi allegato 21)

Posters

Colantuono C., Ambrosino L., Chiusano M.L. (2015) "Omics for Plant Sciences: where are the reference resources?" – Third SPOT – ITN conference, March 18-22th Sorrento, Italy (abstract vedi allegato 22)

Chiusano M.L., Colantuono C., Ambrosino L. (2015) "Omics for crop improvement: meeting the challenge of integration in a still young, multifaceted world" - joint Congress SIBV-SIGA 2015, Feeding the planet: plant science and breeding for the future, September 8-11th Milano, Italy (abstract vedi allegato 20)

Ambrosino L., Chiusano M.L. (2013). "In Quest of Orthologs" – BBCC 2013 Ottava Edizione, 15 Novembre 2013, Avellino, Italia (abstract vedi allegato 23)

Developed softwares

Transcriptologs: programma per la predizione di relazioni di ortologia basato sull'analisi di sequenze di trascritti provenienti da due specie distinte, scritto nel linguaggio di programmazione Python. *Transcriptologs* è scaricabile gratuitamente presso il link: <https://github.com/LucaAmbrosino/Transcriptologs.git>

Tale software è stato oggetto del lavoro scientifico: Ambrosino, L., Chiusano, M.L. (2017). "Transcriptologs: a transcriptome-based approach to predict orthology relationships." (vedi allegato 12)

pATsi: database di geni paraloghi in *Arabidopsis thaliana*, liberamente consultabile accedendo al sito web: <http://cab.unina.it/athparalog/main2.html>

Tale database è stato oggetto del lavoro scientifico: Ambrosino, L., H. Bostan, P. di Salle, M. Sangiovanni, A. Vigilante and M. L. Chiusano (2016). "pATsi: Paralogs and Singleton Genes from *Arabidopsis thaliana*." (vedi allegato 15)

Bioinformatics courses

Statistics (20 hours - 4 C.F.U.) – Università degli Studi di Napoli “Federico II”, May-June 2015

“A crash-course on Python” – CNR, Napoli, 19-21 Novembre 2014

Bioinformatics (20 hours - 4 C.F.U.) - Università degli Studi di Napoli “Federico II”, February-March 2014

“Intermediate Python programming” – CNR, Napoli, 31 Gennaio 2014

“Python for beginners” – CNR, Napoli, 10 Gennaio 2014

“InterOmics Tutorial Day” – CNR, Napoli, 14 Novembre 2013

Partecipation to congresses and seminars

“Feeding the planet: plant science and breeding for the future”, 8-11 Settembre 2015

“Epigen Chromatin”, 11 maggio 2015

“Agricoltura e Biotecnologie”, 27 Aprile 2015

“Futuro tecnologie NGS”, 26 Aprile 2015

“Stress Biology and Crop Fertility”, 18-22 Marzo 2015

“Evoluzione tecnologie e progressi scienza”, 25 Febbraio 2015

“Global quantitative understanding of a living system”, 20 Febbraio 2015

“Results in GenoPom Projects”, 22-23 Gennaio 2015

“Regressione PLS”, 8 Gennaio 2015

“Gene capture in pepper”, 18 Dicembre 2014

“Metabolomics and heat stress in tomato”, 2 Dicembre 2014

“Ionomica in Pomodoro”, 27 Novembre 2014

“Bringing maths to life”, 27-29 Ottobre 2014

“Abiotic stress on tomato”, 23 Ottobre 2014

“Quality Fruit, cost action FA1106”, 21-24 Settembre 2014

“De novo genome assembly”, 17 Giugno 2014

“RNA-seq to non model organism”, 12 maggio 2014

“Pathogen stress in tomato”, 6 Marzo 2014

“Sequenziamento pomacee”, 26 Febbraio 2014

- “Sequenziamento solanacee”, 25 Febbraio 2014
- “Darwin Day”, 12 Febbraio 2014
- “Tracking genetic variation in potato”, 30 Gennaio 2014
- “GenoPom Projects”, 21-22 gennaio 2014
- “Structural properties of protein structures”, 20 Dicembre 2013
- “Conditional cDNA”, 9 Dicembre 2013
- “Genomics and computational advances”, 5 Dicembre 2013
- “Lentils”, 27 Novembre 2013
- “BBCC 2013”, 15 novembre 2013
- “Modular organizations of human protein interaction maps”, 1 Ottobre 2013
- “Solanum dulcamara”, 18 Luglio 2013
- “Synthetic biology”, 16 Luglio 2013
- “Working with next generation sequencing data”, 9 Luglio 2013
- “A biocontrol agent among plant pathogens”, 4 Giugno 2013

Partecipation to National or International Projects

2016 – Grant as part of the italian project “AIB 2011 Parco Nazionale del Cilento e Vallo di Diano (Rif.: Bando AIIB-DIA, responsabile scientifico: Prof. Stefano Mazzoleni)”, carrying out the research activity: “implementation of bioinformatics methodologies for comparative genomics”, *with the aim of developing pipelines for prediction of ortholog, paralog and species-specific genes in Solanum lycopersicum (tomato) and Solanum tuberosum (potato)*.

2016 – Partecipation to the international project “Solanaceae Pollen Thermotolerance – Marie Curie Initial Training Network project (Grant agreement no. 289220, coordinatore: Prof. Enrico Schleiff)”, contributing as first author to the publication: “*Bioinformatics resources for pollen*”, and contributing as co-author to the poster “*Omics for Plant Sciences: where are the reference resources?*” at international congress “*Third SPOT – ITN conference*”.

2015/2017 – Italian Co.Co.Co (continuous collaboration contract) as part of the italian project “GENHORT - Valorizzazione di produzioni ortive campane di eccellenza con strumenti di genomica avanzata (PON02_00395_3215002, Rif.: Bando GENHORT/1 piattaforma bioinformatica, responsabile scientifico: Prof. Luigi Frusciante)”, carrying out the research activity: *set up of a bioinformatics platform for comparative genomics of Solanaceae*, and contributing as first author to 4 publications: “*Bioinformatics resources for plant genomics: bottlenecks and opportunities in the -omics era*”, “*Transcriptologs: a transcriptome-based approach to predict orthology relationships*”, “*Bioinformatics resources for pollen*”, “*pATs: Paralogs and Singleton Genes from Arabidopsis thaliana*”, contributing as first author to the oral presentation: “*Solanum lycopersicum versus Vitis vinifera: a multilevel gene comparison from fleshy fruit species*”, and as co-author to the poster “*Omics for crop improvement: meeting the challenge of integration in a still young, multifaceted world*” to the international congress

"joint Congress SIBV-SIGA 2015, Feeding the planet: plant science and breeding for the future".

2015/2017 – Partecipation to the national project "GENOPOM PRO Potenziamento della filiera pomodoro attraverso l'uso di piattaforme integrate di post-genomica (PON02_00395_3082360, responsabile scientifico: Prof. Luigi Frusciante)" carrying out the research activity and contributing as first author to: "Bioinformatics resources for plant genomics: bottlenecks and opportunities in the -omics era", "Transcriptologs: a transcriptome-based approach to predict orthology relationships", "Bioinformatics resources for pollen", "pATsi: Paralogs and Singleton Genes from *Arabidopsis thaliana*", and contributing as co-author to the poster: "Omics for crop improvement: meeting the challenge of integration in a still young, multifaceted world" at the international congress "joint Congress SIBV-SIGA 2015, Feeding the planet: plant science and breeding for the future".

2015 - Partecipation to the national project "MIUR project PON02_00619" carrying out the research activity of developing an automatized method for metabolic analyses and modeling of metabolic networks, and contributing as co-author to the publication: "The MetaboX Library: Building Metabolic Networks from KEGG Database".

2015 - Partecipation to the national project "Italian Flagship project Interomics" carrying out the research activity of developing an automatized method for metabolic analyses and modeling of metabolic networks, and contributing as co-author to the publication: "The MetaboX Library: Building Metabolic Networks from KEGG Database".

2015 – Partecipation to the international project "CNR-CAS Cooperation Agreement 2011–2013 Discovery of new extremozymes and their potential use in biotechnology", carrying out the research activity and contributing as co-author to the publication: "Identification and characterization of a novel salt-tolerant esterase from a Tibetan glacier metagenomic library".

2014/2017 – Partecipation to the international project "COST Action FA1106 - An integrated systems approach to determine the developmental mechanisms controlling fleshy fruit quality in tomato and grapevine (responsabile scientifico: Prof. Mondher Bouzayen)", and grant winner for the oral presentation: "Characterization of derivative relationship between tomato and grapevine: a key step to investigate fruit development in the two species" to the international congress "3rd Annual Conference of the Cost Action FA1106", and contributing as first author to 3 publications: "Bioinformatics resources for plant genomics: bottlenecks and opportunities in the -omics era", "pATsi: Paralogs and Singleton Genes from *Arabidopsis thaliana*", "Transcriptologs: a transcriptome-based approach to predict orthology relationships".

2014 – Partecipation to the national project "P.N.R.A. (Italian National Antarctic Research Programme) 2009–2011", carrying out the activity research and contributing as co-author to the publication: "A New Alkaliphilic Cold-Active Esterase from the Psychrophilic Marine Bacterium *Rhodococcus* sp.: Functional and Structural Studies and Biotechnological Potential".

2013 – Grant as part of the regional project "C.A.R.I.N.A. – Sicurezza, sostenibilità e competitività delle produzioni agroalimentari della Campania (P.O.R. Campania FSE 2007–2013, Bando n. IGV-025-2013-NA, Gazzetta Ufficiale n. 67 del 23-08-2013, responsabile scientifico: Dott.ssa Maria Stefania Grillo)", carrying out the research activity: "Implementation of bioinformatics platforms for comparative genomics of agronomic species", developing a public database database of *Arabidopsis thaliana* paralog genes, and a comparative strategy based on the comparison of mRNA sequences of *Arabidopsis thaliana* e *Sorghum bicolor*.

Collaboration activity for bioinformatics analyses and services.

2014/2015 – Scientific collaboration with Dott.ssa Donatella De Pascale, researcher of the Istituto di Biochimica delle Proteine del Consiglio Nazionale delle Ricerche IBP-CNR sito in via

Pietro Castellino 111, Napoli, carrying out the research activity of tridimensional modeling of protein structures and molecular dynamics activities on proteins from anctic bacteria. This activity contributed to the publication of: "A New Alkaliphilic Cold-Active Esterase from the Psychrophilic Marine Bacterium Rhodococcus sp.: Functional and Structural Studies and Biotechnological Potential", "Identification and characterization of a novel salt-tolerant esterase from a Tibetan glacier metagenomic library", "Characterization of a cold-active and salt tolerant esterase identified by functional screening of Arctic metagenomic libraries".

2015 – Scientific collaboration with Dott. Mario Guerracino, researcher of Istituto di Calcolo e Reti ad alte prestazioni del Consiglio nazionale delle Ricerche ICAR-CNR sito in via Pietro Castellino 111, Napoli, carrying out the research activity of metabolic network modeling. This activity contributed to the publication of: "The MetaboX Library: Building Metabolic Networks from KEGG Database".

2014 – Scientific collaboration with Dott.ssa Stefania Grillo, researcher of the Istituto di Bioscienze e Biorisorse del Consiglio Nazionale delle Ricerche IBBR-CNR sito in via Università 133, Portici (NA), carrying out the research activity of prediction of structural and functional homologs of "sweet-taste proteins" from plant species .
