

Filomena Ristoratore

Nationality: Italian Date of birth: 15/04/1965

✉ Email address: filomena.ristoratore@szn.it

PRESENT POSITION

Position

[01/12/2020 – Current]

Scientist, Ricercatore II livello- Department of Biology and Evolution of Marine Organisms - Stazione Zoologica Anton Dohrn, Villa

Comunale, 80121 Napoli, Italy

EDUCATION AND TRAINING

Associate Professor Qualification in Comparative Anatomy and Cytology

[05/08/2018 – Current]

Address: (Italy)

PhD (Cellular and Molecular Biology and Pathology)

Università degli studi di Napoli Federico II, Napoli (Italy) [26/09/1996]

Thesis: Title: "Characterization of Hox gene Complex in the ascidian Ciona intestinalis."

Summa cum Laude Laurea (Biological sciences)

Università degli studi di Napoli Federico II, Napoli (Italy) [22/07/1988]

Thesis: Title: The Role of cellular junction in differentiation of germinal cells and in folliculogenesis

WORK EXPERIENCE

Staff Scientist (Ricercatore II Livello,TI)

Stazione Zoologica Anton Dohrn, Napoli [01/12/2020 – Current]

City: Naples

Country: Italy

Direction of a research group focused on

1. Elucidate the role of nervous system new candidate genes in Ciona development by studying their transcriptional regulation and their function by CRISPR/Cas9 inactivation.
2. Development and evolution of pigmented sensory organs in chordates
3. Role of anthropogenic underwater noise on ascidians development and behaviour.

Staff Scientist (Ricercatore III Livello, TI)

Stazione Zoologica Anton Dohrn [01/05/2000 – 29/11/2020]

City: Naples

Country: Italy

■ **2014- to 2022.** Collaboration on a project aimed to study of the "Long non-coding RNAs" and the transposable elements in the Octopus vulgaris nervous system. We have studied the presence of a still active transposable element in the Octopus genome. expression study of this element suggests its specific enrichment in neurons

associated with behavioral plasticity. Studies are underway to confirm the ability of the isolated element to reverse transcribe

■ **2008- to 2020.** Direction of a research group focused on "Development and evolution of pigmented sensory organs in chordates". We employed for the first time a pigment cell lineage-specific whole genome transcription profiling to characterize the FGF downstream expression program that governs pigment cell formation in the ascidian *Ciona robusta*.

Study on Molgulidae species with different mode of development and different pigmentation patterns, revealed trace of pseugenization mechanisms occurring in the *Molgula occulta* (that lack pigmentation) in pigmentation genes.

■ **2006-2009.** Direction of a research group aimed to search for a stem cell population in the larva of *C. intestinalis*. The study aimed to find and characterize new determinants that regulate the maintenance of neural stem cells in the undifferentiated state and / or the inversion of differentiated neural cells towards the pluripotent state of neural stem cell. Development of a protocol for primary cell culture from dissociated larvae of *C. intestinalis*. It was possible, for the first time, to put in culture and maintain for about two weeks all the cells present in the larva of *Ciona*.

Research postdoctoral fellow

"Laboratoire di Genetique des Poissons" dell'INRA [30/09/1997 – 30/12/1999]

City: Jouy-en-Josas (Paris)

Country: France

1. ■ Role of engrailed on the medaka fish (*Oryzias latipes*) nervous system regionalization.
2. ■ New techniques for transgenesys in fish.

Visiting Scientist

Developmental Biology Programme Group EMBL [14/09/1999 – 29/09/1999]

City: Heidelberg

Country: Germany

- Mutagenesis screening in Medaka fish.

PhD (Cellular and Molecular Biology and Pathology)

Università degli studi di Napoli Federico II [02/11/1991 – 26/09/1996]

City: Naples

Country: Italy

Characterization of genes controlling development of the ascidian *Ciona intestinalis*.

Research student

Università degli studi di Napoli Federico II, Department of Evolutionary Biology [05/1987 – 07/1988]

City: Naples

Country: Italy

Studies on ultrastructural aspects of oogenesis in *Podarcis s. sicula raf.* Analisis of several cellular junctions during the differenziation of germinal cells and folliclogenesis.

CNR research fellow

Consiglio Nazionale delle Ricerche (CNR). Istituto Internazionale di Genetica e Biofisica [11/1989 – 10/1991]

City: Naples

Country: Italy

- Characterization of a chemioreception mutant in the nematode *Caenorhabditis elegans*

- Immunolocalization of cut-1 and cut-2 in *C. elegans*.

HONOURS AND AWARDS

Member of the Scientific Evaluation Panel ATIP Avenir LS3

Inserm [2019]

Associate Professor Qualification

[2018]

Associate Professor Qualification in Comparative Anatomy and Cytology (Abilitazione Scientifica Nazionale Seconda Fascia, settore concorsuale BIO/06 ANATOMIA COMPARATA E CITOLOGIA)

Member of the Scientific Evaluation Panel ANR

2016-2017 Member, as a scientific expert, of the Scientific Evaluation Panel CE12 "Genetics genomics- RNA committee" of the The French National Research Agency (ANR) 2017

Fellowship from the National council of research

1989/1991: Fellowship from the National council of research (C.N.R.) (All Fell. 1)

EDITORIAL ACTIVITIES

Review Editor for Invertebrate Physiology, Frontiers in Physiology

[2020 – Current]

Guess editor Dev Biol

2017-2019: Guess Editor on the Board of the journal Developmental Biology on - "Current Directions in Tunicate Biology"

[https://www.journals.elsevier.com/developmental-biology/call-for-papers/special-issue-on-currentdirections-in-tunicate-biology](https://www.journals.elsevier.com/developmental-biology/call-for-papers/special-issue-on-current-directions-in-tunicate-biology)

GRANT SUPPORT

JPI Oceans, Underwater noise in the marine environment

[2022 – Current]

Project title: "Deuteronoise: Characterization of maritime noise in different European basins and its impact on ecological relevant deuterostome invertebrates". Role: principal investigator and coordinator for SZN Finantial support: € 100.000.

PON PRIMA

[2018 – Current]

Member of the committee for the PON PRIMA (Potenziamento Ricerca e Infrastrutture Marine) for the OR Genome editing, and cell culture room. reference person for the cell culture room.

EU INFRAIA Assemble plus

[2016 – 2022]

EU INFRAIA Assemble plus "Association of European Marine Biological Laboratories Expanded". Call: H2020-INFRAIA-2016-2017. The goal is to stimulate European excellence in fundamental and applied research in marine biology and ecology, thereby improving our knowledge- and technology-base for the blue economy. Joint Research Activities (JRA) involving all partners aim to develop innovative new technologies and/or methodologies to be offered to users through the TA programmes. Involved in the Joint Research Activity 3 "Functional genomics" which aim is to improve methods of interference with gene function in marine models. Role: principal investigator and coordinator for SZN JRA3 Financial support: € 133.750.

EU Infradev Corbel

[2014 – 2019]

"Coordinated Research Infrastructures Building Enduring

Lifescience Services ". EU Horizon 2020 research and innovation programme (GA No 654248). Involved in the project as an expert of ascidian marine models. Role: staff scientist. Financial support: € 90.700.

FIRB

[2012 – 2019]

(Futuro in Ricerca- MIUR): Non-Coding RNA Explosion: Novel Implications in Neurotrophin Biology (RBFR12QW4I). Involved in this project as an expert of expression analysis and non coding RNA. Principal investigator: Salvatore D'Aniello. Role: staff scientist. Financial support: € 864.000.

ABBaCo

[2015 – 2019]

"Restauro ambientale e balneabilit. del SIN Bagnoli-Coroglio". Financed by Cipe, Fondo integrativo speciale per la ricerca (FISR) 2015 and 2016. Role staff scientist for WP 4, Financial support: € 30.000,00

Ritmare

[2012 – 2017]

(MIUR- Progetto Bandiera): 6-WP3 Attivit. di formazione, A2 Predisposizione di Dottorati di Ricerca, Master (I e II livello) e Corsi di perfezionamento sugli argomenti oggetto di ricerca in ambito RITMARE. Role: Principal investigator for WP3. Financial support: €80000

Assemble grant

Received one accesses from ASSEMBLE Transnational Access for access to the Station Biologique de Roscoff with a project entitled "Investigating Mechanisms of Development in a tailless ascidian, Molgula occulta (Evolution and Development in Molgula, MoEvoDevo)".

Assemble grant

[2007 – 2013]

"Improving the provision of cultures of marine protists and cell lines of marine animals". Principal investigator: Laura Zanetti. Role: staff scientist involved in the set up of new protocols for primary cell culture from ascidian *Ciona intestinalis*.

EC, FP6-STREP PLURIGENES

[2003 – 2009]

"Pluripotency associated genes to de-differentiate neural cells into pluripotent cells". Role: principal investigator (coordinator of SZN unit). Financial support: € 210,000.

Network of Excellence (NoE) Marine Genomics Europe

[2003 – 2009]

Role: Staff scientist

COMMUNICATION AND INTERPERSONAL SKILLS

Communication and interpersonal skills

excellent communication skills testified by (i) invitation as speaker to Conference, Departmental Seminars, (ii) Teaching and (iii) Outreach activities

MANAGEMENT AND LEADERSHIP SKILLS

Organisational / managerial skills

Leadership skills gained as responsible for research teams of 3-5 people including postdocs, PhDs and undergraduate students.

- Organizational skills gained through: (i) PI, or WP coordinator for EU financed project; (ii) the participation to several Committee and Panels;
 - Service and Committee Work performed at SZN since 2000 and through the organization of international Meetings,
-

PATENT

“Random integration of a polynucleotide by in vivo linearization”

Possessor of international US patent number 7098031 (publication August 29, 2006) and international Patent number 20030106077 (June 5, 2003) entitled: “Random integration of a polynucleotide by in vivo linearization”.(Patent 1US and Patent1_international).
